

The City of Red Deer
Environmental Services.

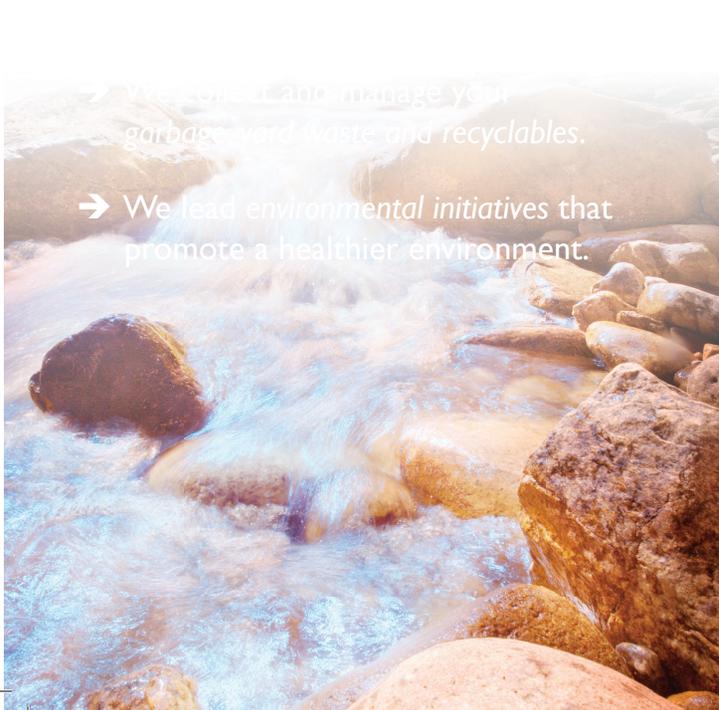

We care about building a
sustainable, environmentally
friendly Red Deer.

→ We produce and distribute safe, high
quality drinking water to our customers.

→ We collect and manage your
garbage, yard waste and recyclables.

→ We lead environmental initiatives that
promote a healthier environment.

Environmental Initiatives

We lead environmental initiatives that
promote a healthier environment.

- We are the contact point
for public environmental
concerns.
- We coordinate internal
environmental programs that
help make The City, as an organization,
more environmentally friendly.

If your blue box has
been lost, stolen or
damaged, please call
the Blue Line for a
replacement.

Blue Line: 403-340-BLUE (2583)

Water Treatment and Distribution

We produce and distribute safe, high quality drinking water to our customers.

→ **Water Treatment Plant**

We take water from the Red Deer River and treat it at the Water Treatment Plant to produce a safe, consistent supply of drinking water. We conduct tests during each step of the treatment process to ensure we are meeting strict public health regulations.

→ **Water Distribution**

We construct, install and maintain the water mains, water meters, fire hydrants, and water valves that supply water to our customers.

Wastewater Collection and Treatment

We collect and treat wastewater to meet strict environmental standards. We also manage the storm water system.

→ **Wastewater Collection**

We construct, maintain, inspect and clean the sanitary sewer system that collects wastewater from our customers and transports it to the Wastewater Treatment Plant.

→ **Wastewater Treatment Plant**

We clean Red Deer's wastewater at the Wastewater Treatment Plant to ensure it meets strict environmental standards. Once the wastewater has been treated we discharge it back into the Red Deer River.

→ **Storm Water System**

We construct, maintain, clean and inspect the catch basins, storm water mains and storm water detention ponds that transport rain water and melted snow back to the Red Deer River.

Waste Management

We collect and manage your garbage, yard waste and recyclables.

→ **Waste Management Facility**

We construct and manage the landfill. We manage programs to keep items like e-waste, scrap metal and household hazardous waste from being landfilled.

→ **Garbage**

We collect and dispose of your garbage.

→ **Yard Waste program**

We collect and dispose of your grass clippings, leaves and branches and turn them into compost.

→ **Recycling Program**

We collect and recycle your blue box items.

For more information on Waste Management programs, please call The City of Red Deer Blue Line at 403-340-BLUE (2583).
